

# *Live Well*

## Planned analyses and evaluations

Luke Munford and Paul Wilson

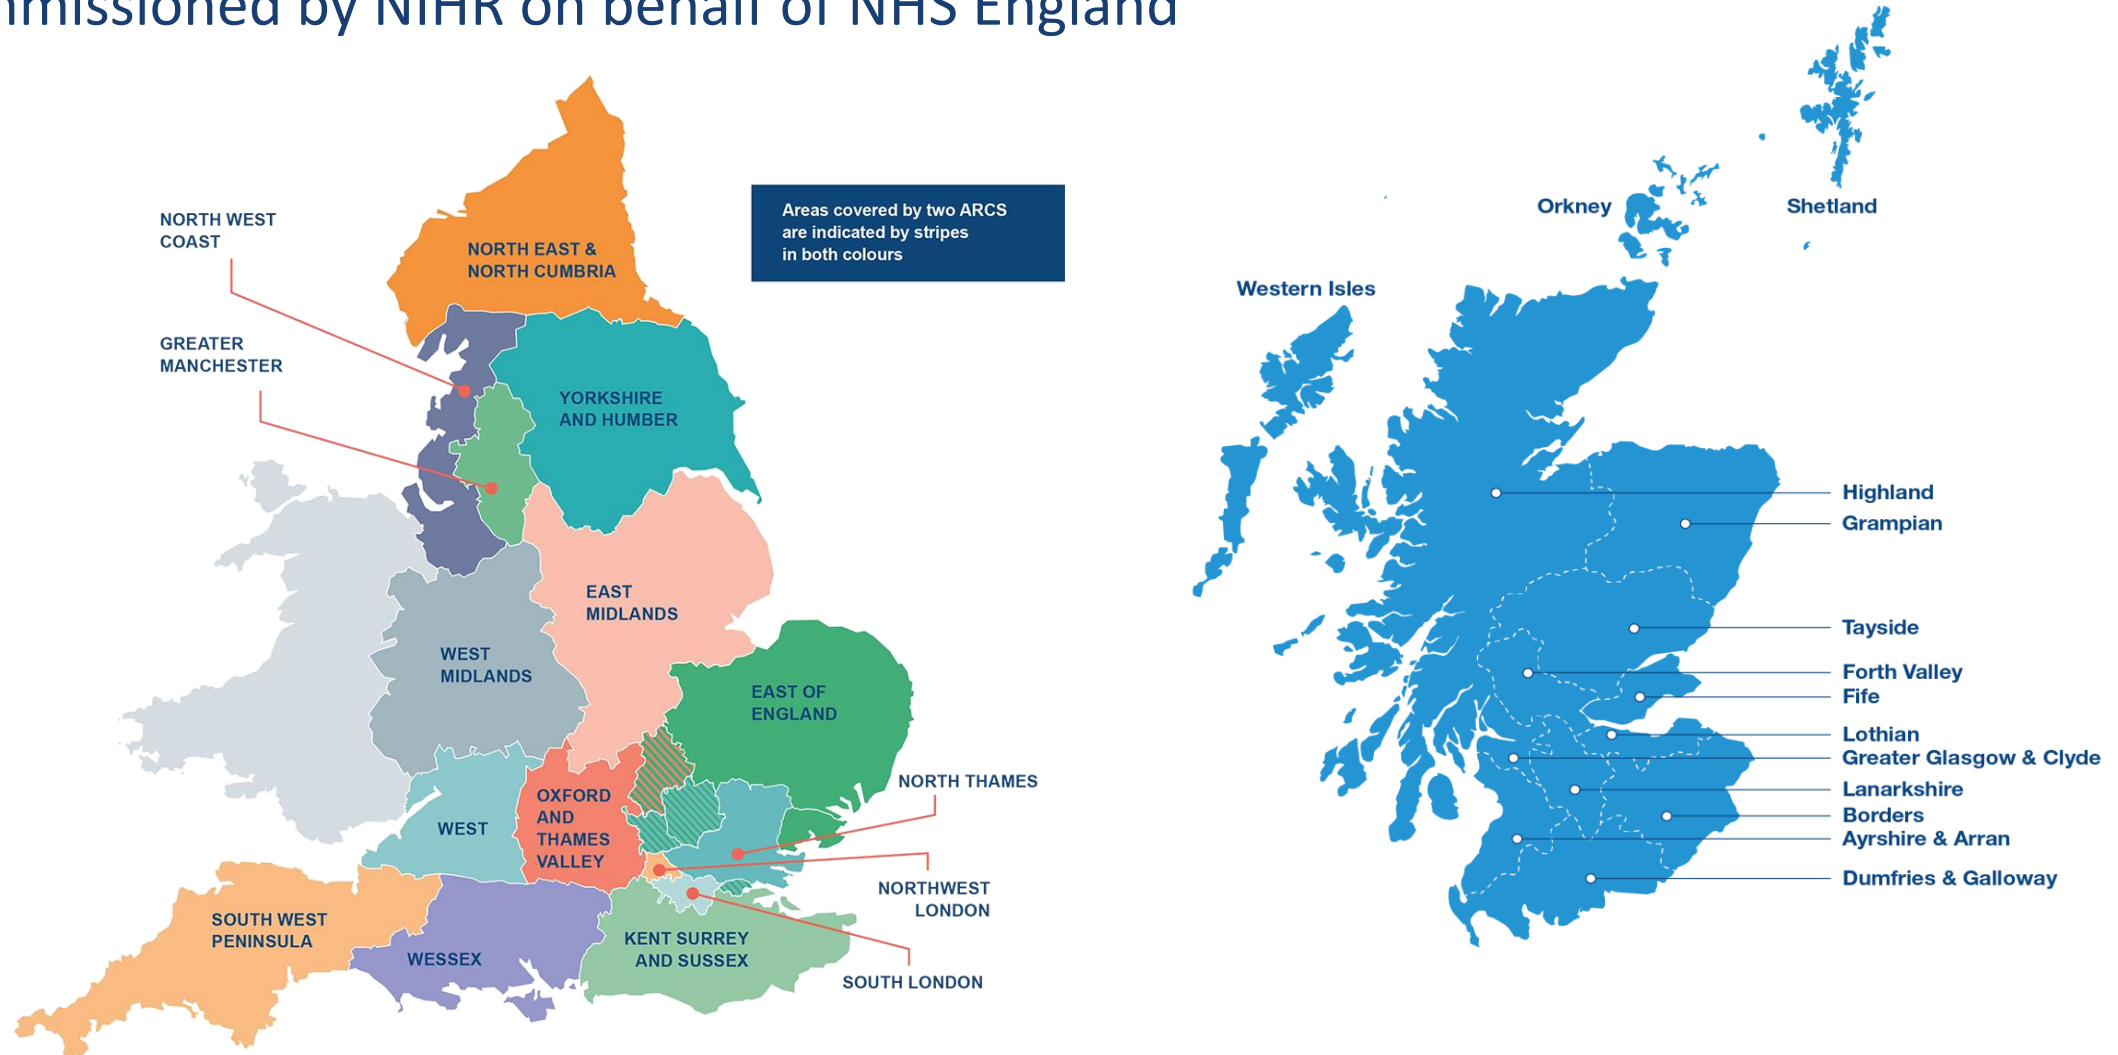

# What evaluations are we currently involved in?

---

1. Multi-region evaluation of the national roll out of social prescribing link workers in primary care
  - Funded by the NIHR; March 2022 to February 2025
  - Led by Paul Wilson
  - Involves members of ICP and GMCA as co-Is
  - Specific focus on 'link worker model'
2. Organisations of Hope: Building a Creative Consortium for Health Equity in Greater Manchester
  - Funded by UKRI (led by AHRC); November 2022 to July 2023
  - Led by Simon Parry (University of Manchester)
  - Involves members of ICP and GMCA as co-Is
  - Specific focus on 'creative health'
  - Phase 3 call is now open...

# 1. Multi-region evaluation of link workers

Commissioned by NIHR on behalf of NHS England

## 2. Organisations of Hope

---

### Our aims

1. Build a transdisciplinary consortium that includes expertise across sectors
2. Explore a range of models for the integration of creative health approaches across GM
3. Prepare to establish community asset hubs in two GM priority areas - children and young people and adult brain health
4. Map community assets across the city region, localities and neighbourhoods to identify those creative and cultural interventions, programmes and activities with the potential to mitigate specific wider determinants of health
5. Build a GM Creative Health Learning Hub, to disseminate knowledge and evidence on creative health practice and to offer training and professional development
6. An agenda for future research and learning

# Developing a wider evaluation of Live Well

---

- Develop and refine separate Evaluation and Research Strategies aligned to Live Well
- Development of a logic model/theory of change linking Live Well to short, medium, and long-term outcomes and exploring the mechanisms between Live Well and improved health and well-being and more sustainable health and care systems
- Understand research activity that is currently ongoing in GM linked to Live Well and related initiatives
- Establish core metrics (linked to logic model and mechanisms i.e. causal pathway) such that change over time can be assessed and linked back to Live Well
- Identify potential areas to target interventions (and control or comparator areas)
- Used to help shape bid to the National Lottery Community Fund and other future bids
