

Abstract

Through my internship journey I have developed my skills in research, spent time learning how to read more critically and worked towards becoming one of the authors on a Systematic Review.

Norman G, Goh EL, Dumville JC, Shi C, Liu Z, Chiverton L, Stankiewicz M, Reid A, **Murphy EMA**. *Negative pressure wound therapy for surgical wounds healing by primary closure*. Cochrane Database of Systematic Reviews 2020, Issue 6. Art. No.: CD009261

Plain Language Summary

I hope to use my knowledge to enhance the culture of critical enquiry in my own workplace and improve staff and patient experiences.

Background

During my time as a Teaching Fellow at Manchester University and wanted to enhance the student experience of Evidence Based Practice.

Objectives

| Primary Outcomes | Secondary Outcomes |
|--|---|
| To interpret research findings into easily understood language to share with colleagues in my place of work. | To meet and work with researchers in the field |
| To Improve my critical reading skills | To think about my future career and possible PhD opportunities. |

Methods

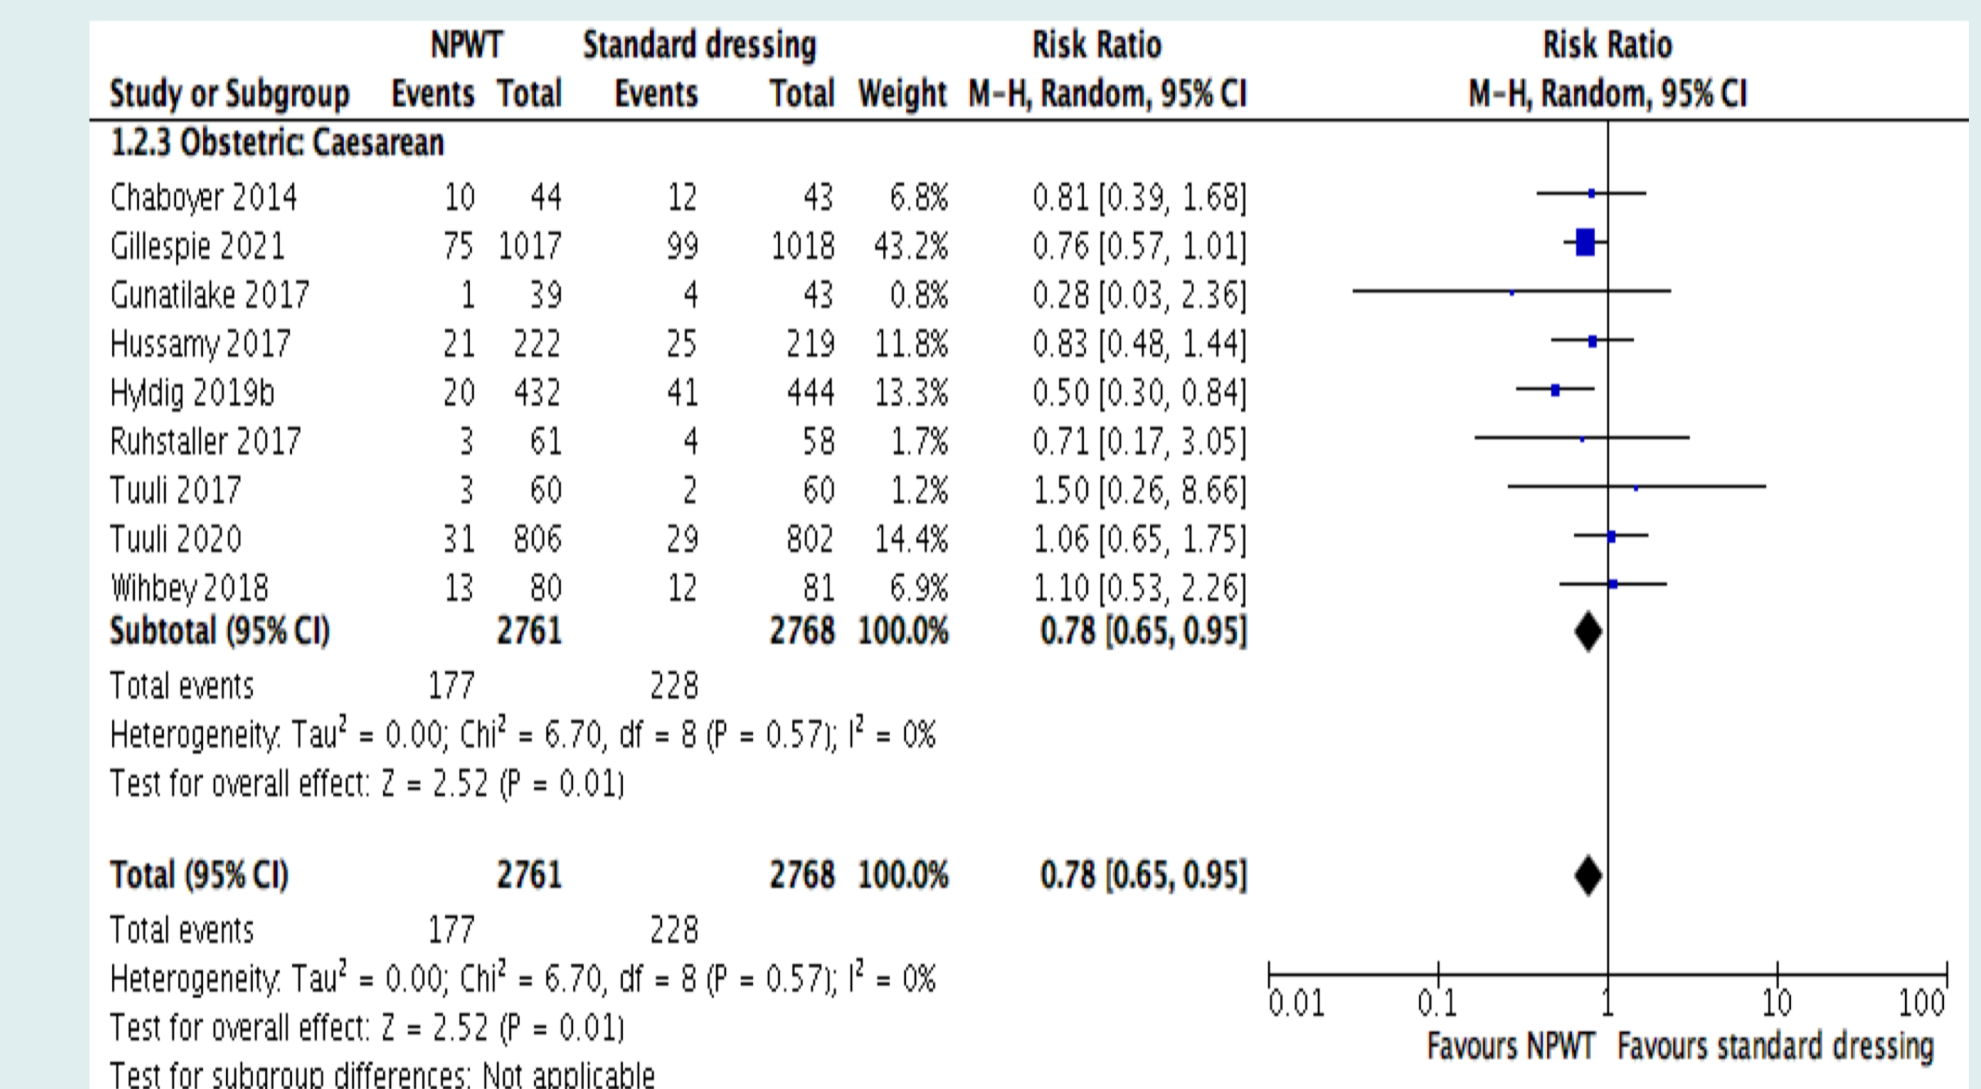

In the Zoom Room

- Granted time out of clinical role
- Supportive relationship with Internship Supervisor
- Access to Research software and Research modules
- Attendance at Cochrane conference and webinars
- Gained practical skills in working on a Systematic Review
- Created subgroup analysis relevant to my place of work
- Spent time in Cochrane Library
- Kept a diary of daily tasks

Results

Obstetric Subgroup Forest Plot

Discussion

Further research work desired.

Conclusion

Huge thanks to everyone at GM ARC especially **Dr. Gill Norman**.
